

Turbine Diameters

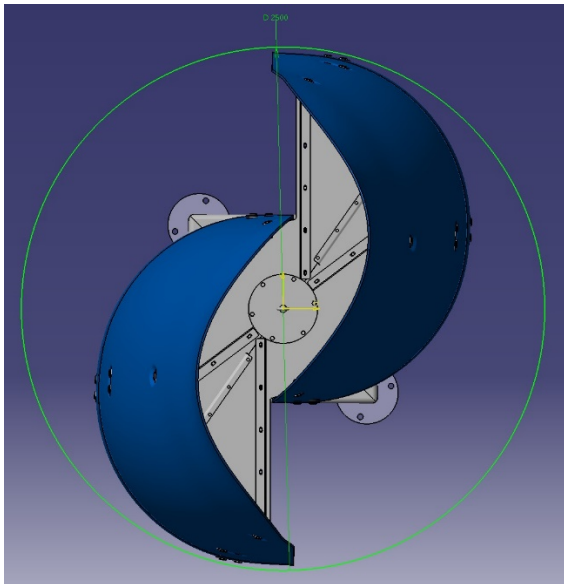

Copyright 2025 Flower Turbines Inc.

The diameter is important in determining the spacing. The space between the turbines should be no less than 10% and no more than 30% times the widest point.

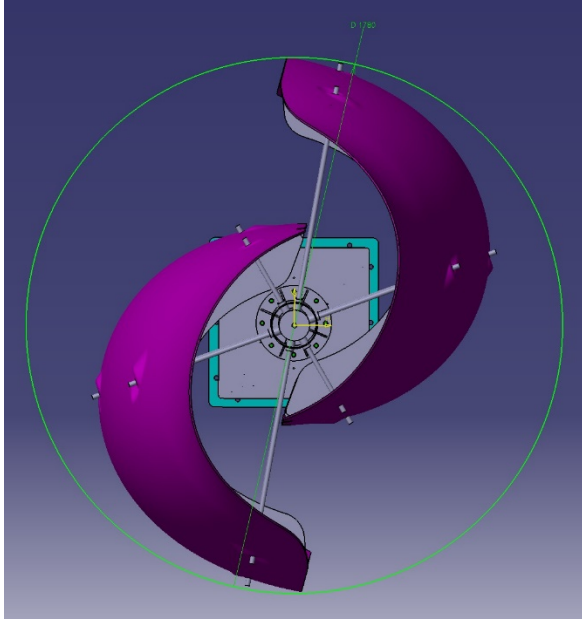

1m: 0.57 m diameter

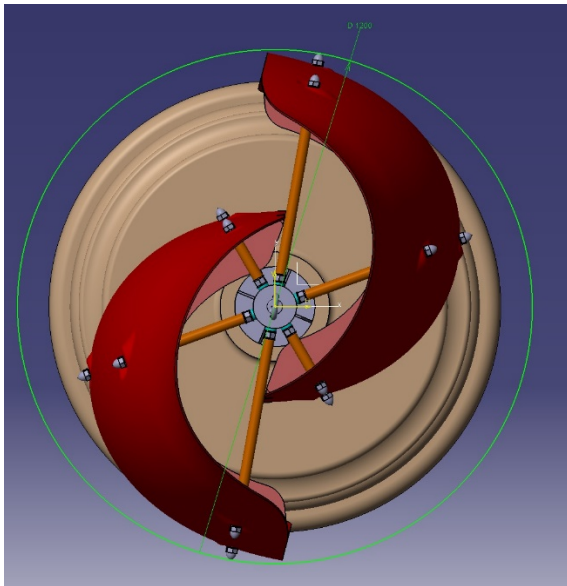

2m turbines: widest point is 1.2m

3m turbines: 1.8m

5m: 2.5m

Power Tower: 1.7m
